SUMMARY

Technical product leader and Agile-certified engineer with 10+ years of experience driving full-stack development across .NET/C#, React, and Node.js. Skilled at translating complex business objectives into clear roadmaps and actionable technical outcomes. A proven bridge between strategy and execution, aligning teams and priorities to deliver scalable, high-impact solutions. Passionate about building products that streamline workflows, drive adoption, and enable sustainable growth.

SKILLS

Product & Leadership / Product Strategy, Stakeholder Alignment, Agile Delivery, Feature Prioritization, Requirements Gathering, Cross-Functional Team Leadership, Mentoring & Coaching, Continuous Improvement

Technical Expertise / TypeScript, JavaScript, C#, React, Next.js, Node.js, SQL, .NET, Tailwind CSS, Prisma/Drizzle ORM, REST APIs, CI/CD, Cloud Infrastructure (AWS, Azure)

Concepts & Practices / Full-Stack Development, System Architecture, Data Modeling, DevOps, Software Design Patterns, Agile (Scrum, Kanban), Documentation & Best Practices

Tools & Platforms / Git, GitHub, Bitbucket, Postman, Bruno, Visual Studio, SQL Server Management Studio, Vercel, Netlify

Soft Skills / Strategic Thinking, Collaboration, Problem Solving, Innovation, Bilingual (English & Spanish)

RECENT EXPERIENCE

Software Engineer / Fellowship of Christian Athletes

Remote / August 2021 - Present

- Functioning as a hybrid technical lead and product partner, collaborating with stakeholders to shape solutions and prioritize delivery across ministry-wide applications.
- Partnered with engineering leadership and product owners to translate business needs into clear technical milestones and roadmaps.
- Co-led the design and implementation of the Interim Reference Check solution, enabling FCA to meet insurance requirements and saving the organization over \$10 million.
- Served as technical lead for a large-scale Rosterfy integration, consolidating multiple systems and improving volunteer experience.
- Spearheaded the launch of FCA Warehouse, saving \$20K in the first month and improving field resource distribution.
- Developed deployment pipelines for .NET projects, reducing deployment times by up to 93%.

Co-Founder, Executive Producer, Operations Manager / Alejandra Music

Remote / July 2021 - Present

- Co-founded and oversee Alejandra Music, a production company dedicated to creating and distributing original Christian music in partnership with Integrity Music (David C. Cook).
- Apply project management and agile principles to coordinate creative, technical, and operational workflows.
- Oversee all phases of music production and business operations, from songwriting and recording to release and royalty management, ensuring alignment with creative vision and business objectives.
- Manage budgets, vendor contracts, and project timelines, maintaining financial accountability and operational efficiency.

LUIS RODRIGUEZ

mrluisrodriguez19@gmail.com / (305) 773-1915 / mrluisrodriguez.com / linkedin.com/in/mrluisrodriguez19

- Coordinate cross-functional teams of artists, engineers, and contractors to meet creative, technical, and business milestones.
- Produce and engineer the majority of releases, combining hands-on technical expertise with strategic leadership to deliver professional, impactful projects.
- Direct logistics and production for live events, conferences, and tours, ensuring seamless execution and audience engagement.

Software Engineer II / Assembly Software

Remote / March 2018 - July 2021, June 2014 - September 2017

- Led UI redesign and modernization of TrialWorks, driving sales growth and improving user satisfaction.
- Partnered with engineering leadership to rebuild core architecture, cutting load times by 84%.
- Collaborated directly with product and business teams to scope features, define acceptance criteria, and balance technical trade-offs in roadmap planning.
- Delivered integrations and automations (Stamps.com, DocuSign) that streamlined workflows and reduced manual processing.

Technical Product Manager II / Visa

Miami, FL / October 2017 - March 2018

- Directed over a dozen international Visa Token Service (VTS) integration projects for major banks, enabling seamless mobile payments with Samsung Pay, Apple Pay, and other wallets.
- Acted as project and product lead for Latin American integrations, overseeing scope, requirements, and delivery.
- Led cross-functional teams across Latin America, guiding banks and third-party teams through Visa's SDKs and APIs to ensure smooth implementation.
- Bridged language barriers with Portuguese-speaking teams by fostering clear communication, leveraging tools like Google Translate, and building trust to achieve collaborative success.
- Created and refined custom test suites for Token Requestor and Issuer APIs to uphold Visa's standards and integration quality.
- Analyzed and resolved token transaction issues using Splunk and Logprint, providing direct feedback to partners and accelerating time to resolution.
- Strengthened Visa's global partnerships by ensuring timely, compliant, and stable mobile wallet integrations.
